Care Technology Buying Workbook

Free preview

A complete decision pack for one service team: a 16-page buyer guide, ten editable Word templates and print PDF, an offline three-supplier calculator, a fictional worked example and a one-page checklist. £39 one-off for one named service team.

Sample requirement prompt

Which ordinary task should improve, who does it, and how will you observe a useful change? Name the existing authorised record and the people whose experience needs to be included.

Three sample demonstration tasks

1. Assign a fictional routine task to an authorised colleague and show how they accept it.
2. Correct an accidental entry and show the attributable audit trail.
3. Export fictional sample information into a format your organisation can read.

A scoring example

An area weighted 30 with a rating of 4 out of 5 contributes 24 points. The five weights must total 100. A high total cannot override a failed or unreviewed essential requirement.
